Profile

Computer Science & Artificial Intelligence student and passionate Full-Stack Engineer with hands-on experience building real-world web applications that align with current market needs. I have developed multiple end-to-end projects, from concept to deployment, with a strong focus on performance, scalability, and user experience. I have completed professional training programs and courses, and I continuously improve my skills through practical, real-world practice. A fast learner, team player, and problem solver who enjoys turning ideas into efficient and impactful technical solutions.

Education

Computer Science & Artificial Intelligence at MTI University, Cairo ,Egypt **September 2024 - Present**

Internships

Full Stack Engineer at Next Information Technology Service Development Company, Cairo ,Egypt **July 2025 - August 2025**

- Full-Stack Developer Trainee – Next Information Technology Completed a full-stack training program where I built real web projects using modern front-end and back-end technologies and gained hands-on experience in the full software development lifecycle.

Skills

Front-End Developer: Front-End Developer (React) Skilled in building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and React, following modern front-end best practices and clean, maintainable code.

Back-End Developer (Node.js & Next.js): Experienced in building scalable back-end systems using Node.js and Next.js, creating RESTful APIs, working with databases, authentication, and server-side rendering. Focused on clean architecture, performance, and secure, efficient application development.

Prompt Engineer: Skilled in crafting effective AI prompts to generate high-quality content quickly and professionally, improving productivity and workflow using AI tools.

Version Control (Git & GitHub): Experience using Git and GitHub for code management, collaboration, and project versioning.

Problem Solving & Debugging: Strong analytical skills with the ability to troubleshoot, debug, and optimize applications efficiently.

Communication & Teamwork Skills: Strong Communication & Teamwork Skills Excellent communication skills gained from working in diverse fields and team environments. Able to collaborate effectively, adapt quickly, solve problems, and manage tasks efficiently in fast-paced workplaces.

Projects

Game store
Developed a modern Game Store web application as a complete full-stack project, The project includes a responsive modern UI, authentication system, product management, shopping cart, and full database integration, demonstrating the ability to build and deliver an end-to-end scalable web solution.

Sales system
Developed a complete Corrugated Carton Sales Management System as a full-stack project, featuring separate dashboards for both managers and sales teams. The system includes customer, orders, and product management, sales tracking, reports and analytics, role-based access control, authentication, and a modern user-friendly interface fully integrated with a database.
